

Do you have an Electric Vehicle?

Please note that there are currently two Electric Vehicle (EV) charging stations at the St. George campus:

- 107 St. George Street (Lot P - Innis/Rotman)
- 213 Huron Street (Lot C - BCIT)

Please only use designated EV chargers to charge your vehicle. Plugging vehicles into standard wall outlets in parking garages is strictly prohibited as the facilities were not designed with this activity in mind. It is a very serious safety and fire hazard and can overload the embedded power circuitry.

Scan for more information or visit transportation.utoronto.ca

Questions? Email us at transportation@utoronto.ca

Additional EV charging stations will be installed at the new Landmark garage (King's College Circle) which will be accessible when the facility opens.

We appreciate your immediate cooperation in this matter.
